“ THINK BIG, WE DO. ”

READY 4.0 CHANGE

Baykal

APHB 31120

From Past to ***Future***

With a foundation history going back to early 1950s, Baykal today is placed as a leading manufacturer and global supplier of sheet metal working machinery specialising in the production of press brakes, shears, notchers, punching machines, laser cutting systems, plasma cutting machines and Vertical Machining Center.

For its manufacturing operations Baykal utilises three factories which together combine a production area of 60,000 square meters, making it one of Europe's largest facility for sheet metal working and fabricating machinery. The total workforce at Baykal is currently numbered at 650 employees and is composed of highly trained and qualified machine operators and assembly technicians supported by a staff of 50 engineers. All the machines offered by Baykal are designed, manufactured, assembled and finished at Baykal's purpose-built plants in a CAD environment with extensive use of CNC machining and modern workshop equipment.

Baykal Company is accredited for the ISO 9001 Certification issued by the German TÜV institution. Also, since 1995, Baykal has been building machines in conformity with the European CE regulations for safety, being the first Turkish machine-tool manufacturer certified eligible to bear the CE Mark on its products. In addition, all Baykal products are manufactured with the TSE and TSEK quality certificates issued by the Turkish Standards Institution.

Since the last 40 years Baykal has progressed to become a major exporter of sheet metal working machines to the world markets with customers located in all the machine-tool consuming countries of the global geography from Americas to Australias. Baykal is currently represented in over 100 countries worldwide through appointed dealers. In the base market of Turkey, Baykal sheet metal working machines have traditionally commanded a leading market share thanks to the company's pioneering role in the development of Turkey's machine industry and its never-lessening emphasis on quality and service. Here, with a long engineering experience behind, Baykal wishes to present itself as a quality-conscious, professional machine-building company serving the industry.

APHS

01

ACCURATE

It's very fast, accurate and repeatable thanks to design and hydraulic system.

02

AFFORDABLE

APHS Series combined with high quality and well-prices.

03

FLEXIBLE

Large range of lengths and tonnages are available.

04

EFFICIENT

APHS series hydraulic press brakes has great efficiency and productivity.

05

QUICK INSTALLATION

Fast and easy installation allow time saving.

06

SAFE

High safety for operators
Suitable for CE Standards

Hydraulic technology: Proven itself

Over the years, manufacturers have been developing different solutions to improve the performance of their products. Through tools, functionalities and technological innovations sheet metal press brakes have evolved starting from mechanical presses to hybrid and electric cnc press brakes. APHS Series have hydraulic system which is very precise, effective and proven itself.

Hydraulic system is used for a long time and benefits of this technology include such as;

User Friendly

Easy to install, use and maintain

Modular

Capable of meeting any production need, with a variety of possible configurations

Bending Complex Parts

Bending complex parts are more easy with longer stroke and daylight

Productive

High productivity by means of reduced cycle times and higher process reliability

Flexible

Suitable for a wide range of products

Headlines to enhance Your **Worklife**

Perfect solution for all bendings.

- **Precise**
- **Affordable**
- **Flexible**
- **Efficient**

APHS model CNC Press Brakes are fast, accurate and repeatable. It has best prices and quality at the market. With affordable prices you can get the best product and compensate the investment in the shortest time. APHS models have wide variety of machine lengths and tonnages. APHS Series Hydraulic Press Brakes are productive and cost efficient machines which prove itself as being one of the world brand.

EFFICIENCY

Efficient production with precise and fast bending.

Baykal

APHS 31120

AUTOMATION

Ready for robotic applications.

INNOVATIVE

Lead to lean manufacturing and ready for industry 4.0

WIDE THROAT DEPTH
Flexibility at bendings.

LONGER OPEN HEIGHT AND STROKE

Complex bending availability.

ERGONOMICS

Full control of operations with one finger.

FRIENDLY CONTROLLER

User friendly control unit.

INTEGRATED SAFETY

Front and rear safeguarding systems allow safe operation.

Important Steps for Perfect Bending.

ACCURATE

Thanks to perfect hydraulic system, machine is faster accurate and efficient.

LINEAR GUIDED MOVEABLE FRONT SUPPORT ARMS

Wide range of support arms for light and heavy-duty sheet metal work.

EXTREMELY STABLE BACKGAUGE

Servo driven (Fast) and CNC controlled (Stable) multiple backgauge configurations from 2 to 6 axis.

CNC MOTORIZED CROWNING

Full length precise bending.

FRONT SHEET FOLLOWER

Heavy and long pieces processed more precise by Baykal front sheet follower with sliding arm.
